

AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions, and listings, of claims in the application:

LISTING OF CLAIMS:

1. (Original) A soil-fumigant-containing solid material containing not less than 60 and not more than 85 weight % of a soil fumigant, not less than 0.5 and not more than 15 weight % of gelatin, not less than 0 and not more than 10 weight % of an inorganic mineral, not less than 1 and not more than 15 weight % of polysaccharide that reacts with a divalent or higher valent metal salt to thereby cause gelation and not less than 0.5 and not more than 20 weight % of water.
2. (Original) The soil-fumigant-containing solid material according to claim 1, wherein the soil fumigant is a soil fumigant having a boiling point of not less than 40° C and a vapor pressure of not less than 70 Pa/20°C.
3. (Original) The soil-fumigant-containing solid material according to claim 2, wherein the soil fumigant is one or more kinds of soil fumigants selected from chloropicrin, D-D and allyl isothiocyanate.
4. (Currently Amended) The soil-fumigant-containing solid material according to ~~any one of claims~~ claim 1 to 3, wherein the polysaccharide that reacts with a divalent or higher valent metal salt to thereby cause gelation is one or more

kinds thereof selected from water-soluble alginate salt, low methoxyl pectin and kappa-carrageenan.

5. (Original) A process for producing the soil-fumigant-containing solid material as described in claim 1 which comprises the following steps (a) to (c):

- (a) a step of producing an O/W type emulsion containing a soil fumigant of not less than 10 and not more than 85 weight % by stirring an aqueous solution of the polysaccharide that reacts with a divalent or higher valent metal salt to thereby cause gelation, a soil fumigant, a gelatin and an inorganic mineral;
- (b) a step of producing a gelated material by reacting the emulsion obtained in the step (a) with a divalent or higher valent metal salt; and
- (c) a step of producing a soil-fumigant-containing solid material by drying the gelated material obtained in the step (b).

6. (Original) The process for producing the soil-fumigant-containing solid material according to claim 5, wherein the soil fumigant is one or more kinds of soil fumigants selected from chloropicrin, D-D and allyl isothiocyanate.

7. (Currently Amended) The process for producing the soil-fumigant-containing solid material according to claim 5 [[or 6]], wherein the polysaccharide that reacts with a divalent or higher valent metal salt to thereby cause gelation is used in an amount of not less than 1 and not more than 15 weight % based on the soil fumigant.

8. (Currently Amended) The process for producing the soil-fumigant-containing solid material according to ~~any one of claims~~ claim 5 to 7, wherein the polysaccharide that reacts with a divalent or higher valent metal salt to thereby cause gelation is one or more kinds thereof selected from water-soluble alginate salt, low methoxyl pectin and kappa-carrageenan.

9. (Currently Amended) The processing for producing the soil-fumigant-containing solid material according to ~~any one of claims~~ claim 5 to 8, wherein the gelatin is used in an amount of not less than 0.5 and not more than 15 weight % based on the soil fumigant.

10. (Currently Amended) The process for producing the soil-fumigant-containing solid material according to ~~any one of claims~~ claim 5 to 9, wherein the inorganic mineral is used in an amount of not less than 0 and not more than 10 weight % based on the soil fumigant.

11. (Currently Amended) The process for producing the soil-fumigant-containing solid material according to ~~any one of claims~~ claim 5 to 10, wherein water is contained in an amount of not less than 0.5 and not more than 20 weight % based on the soil-fumigant-containing solid material when the gelated material obtained in the step (b) is dried.

12. (Currently Amended) A soil-fumigant-containing solid material produced according to the method in the step (c) as described in ~~any one of claims~~ claim 5 to 11.

13. (Currently Amended) A gelated material produced according to the method in the step (b) as described in ~~any one of claims~~ claim 5 to 10.

14. (Currently Amended) An O/W type emulsion produced according to the method in the step (a) as described in ~~any one of claims~~ claim 5 to 10.
